Fuel Surcharge Mechanism

Fuel surcharge is adjusted on the 1st of each month based on the previous month, first weeks figure using current published UK Government Weekly Road Fuel Prices.

<https://www.gov.uk/government/statistical-data-sets/oil-and-petroleum-products-weekly-statistics>

Fuel Surcharge calculation methodology*

Calculation of the fuel surcharge is based on two main factors, the invoice subtotal before VAT and the current price per litre of fuel.

Based on the price per litre of fuel, a fuel surcharge percentage is applied to your invoice subtotal before VAT.
